

Gluster Grows Global Reach through Partnership With CSS Corp

SUNNYVALE, Calif.--(BUSINESS WIRE)

Press Release Source: Gluster On Monday September 26, 2011, 9:30 am EDT

Leading Information and Communications Technology Services Company adds GlusterFS to portfolio to deliver a high-performance, scale-out storage system to help organizations control rising storage costs

Gluster, the leading provider of scale-out, open source storage solutions, today announced its partnership with CSS Corp, a global Information and Communications Technology (ICT) services company. CSS Corp's presence in key markets like the US, Europe and India will help Gluster meet the widespread demand and need for an innovative scale-out NAS storage solution like GlusterFS.

"We at CSS Corp, focus extensively on talent and experience to ensure that our end users' needs are being met capably, comprehensively and cost-effectively. By partnering with Gluster, we are expanding our storage services and offering our customers a scale-out storage solution that will help organizations control perpetually rising storage costs and thus enjoy great and secure storage services," said Sandip Deb, senior vice president at CSS Corp.

Gluster's software-only solutions enable enterprises to deploy storage as a virtualized, commoditized, and scale-on-demand pool, radically reducing storage costs. CSS Corp is focused on designing, developing, deploying and managing end-to-end IT and network services for its clients that will allow them to address the current and future needs of their infrastructure. With the addition of GlusterFS to its array of services, CSS Corp will now be able to deliver a storage option to customers requiring massively scalable, highly available storage for their dynamic storage infrastructure.

"CSS Corp has a proven track record and global reach to deliver enhanced value and innovative services to its customers," said Jeff Olson, senior director of channel sales at Gluster. "The worldwide popularity of Gluster is growing every day and with CSS Corp's global presence we are pleased to team up with them on this new agreement. We are looking forward to helping their customers reduce storage costs and scale performance while also providing high availability on demand."

About Gluster Technology

Gluster's software-only solutions let enterprises deploy storage the same way they deploy computing today—as a virtualized, commoditized, and scale-on-demand pool, radically improving storage economics. Combined with the customer's choice of commodity computing and storage resources, Gluster can scale-out to petabytes of capacity and GB/s of throughput at a fraction of the cost of proprietary systems. Gluster ensures high availability with n-way replication both within and between public and private data centers. Gluster is deployable both on-premise (as a virtual appliance or bare-metal software appliance) and in public clouds such as Amazon Web Services. Gluster is the primary author and maintainer of the open-source GlusterFS software, which has been downloaded over 200,000 times.

About Gluster

Gluster is the leading provider of open source, scale-out storage solutions. Over 150 enterprises worldwide have used Gluster in commercial deployments ranging from a few terabytes to multiple petabytes, across the most demanding applications in digital media delivery, healthcare, Internet, energy and biotech. Gluster is privately-held and headquartered in Sunnyvale, California. Visit us at www.gluster.com.
