

Harmonize, Automate and Modernize IT Operations

with Intelligent Automation

Just as electricity transformed almost everything 100 years ago, today we have a hard time imagining an industry that AI cannot transform in the next few years. Recent advances in Artificial Intelligence (AI), analytics, and automation are pushing the boundaries of what machines can do in all facets of business and IT.

Presently, companies are spending a colossal amount of money to streamline their IT and business operations, as no amount of growth is possible without a robust automated infrastructure.

Why Infrastructure Needs to be Automated?

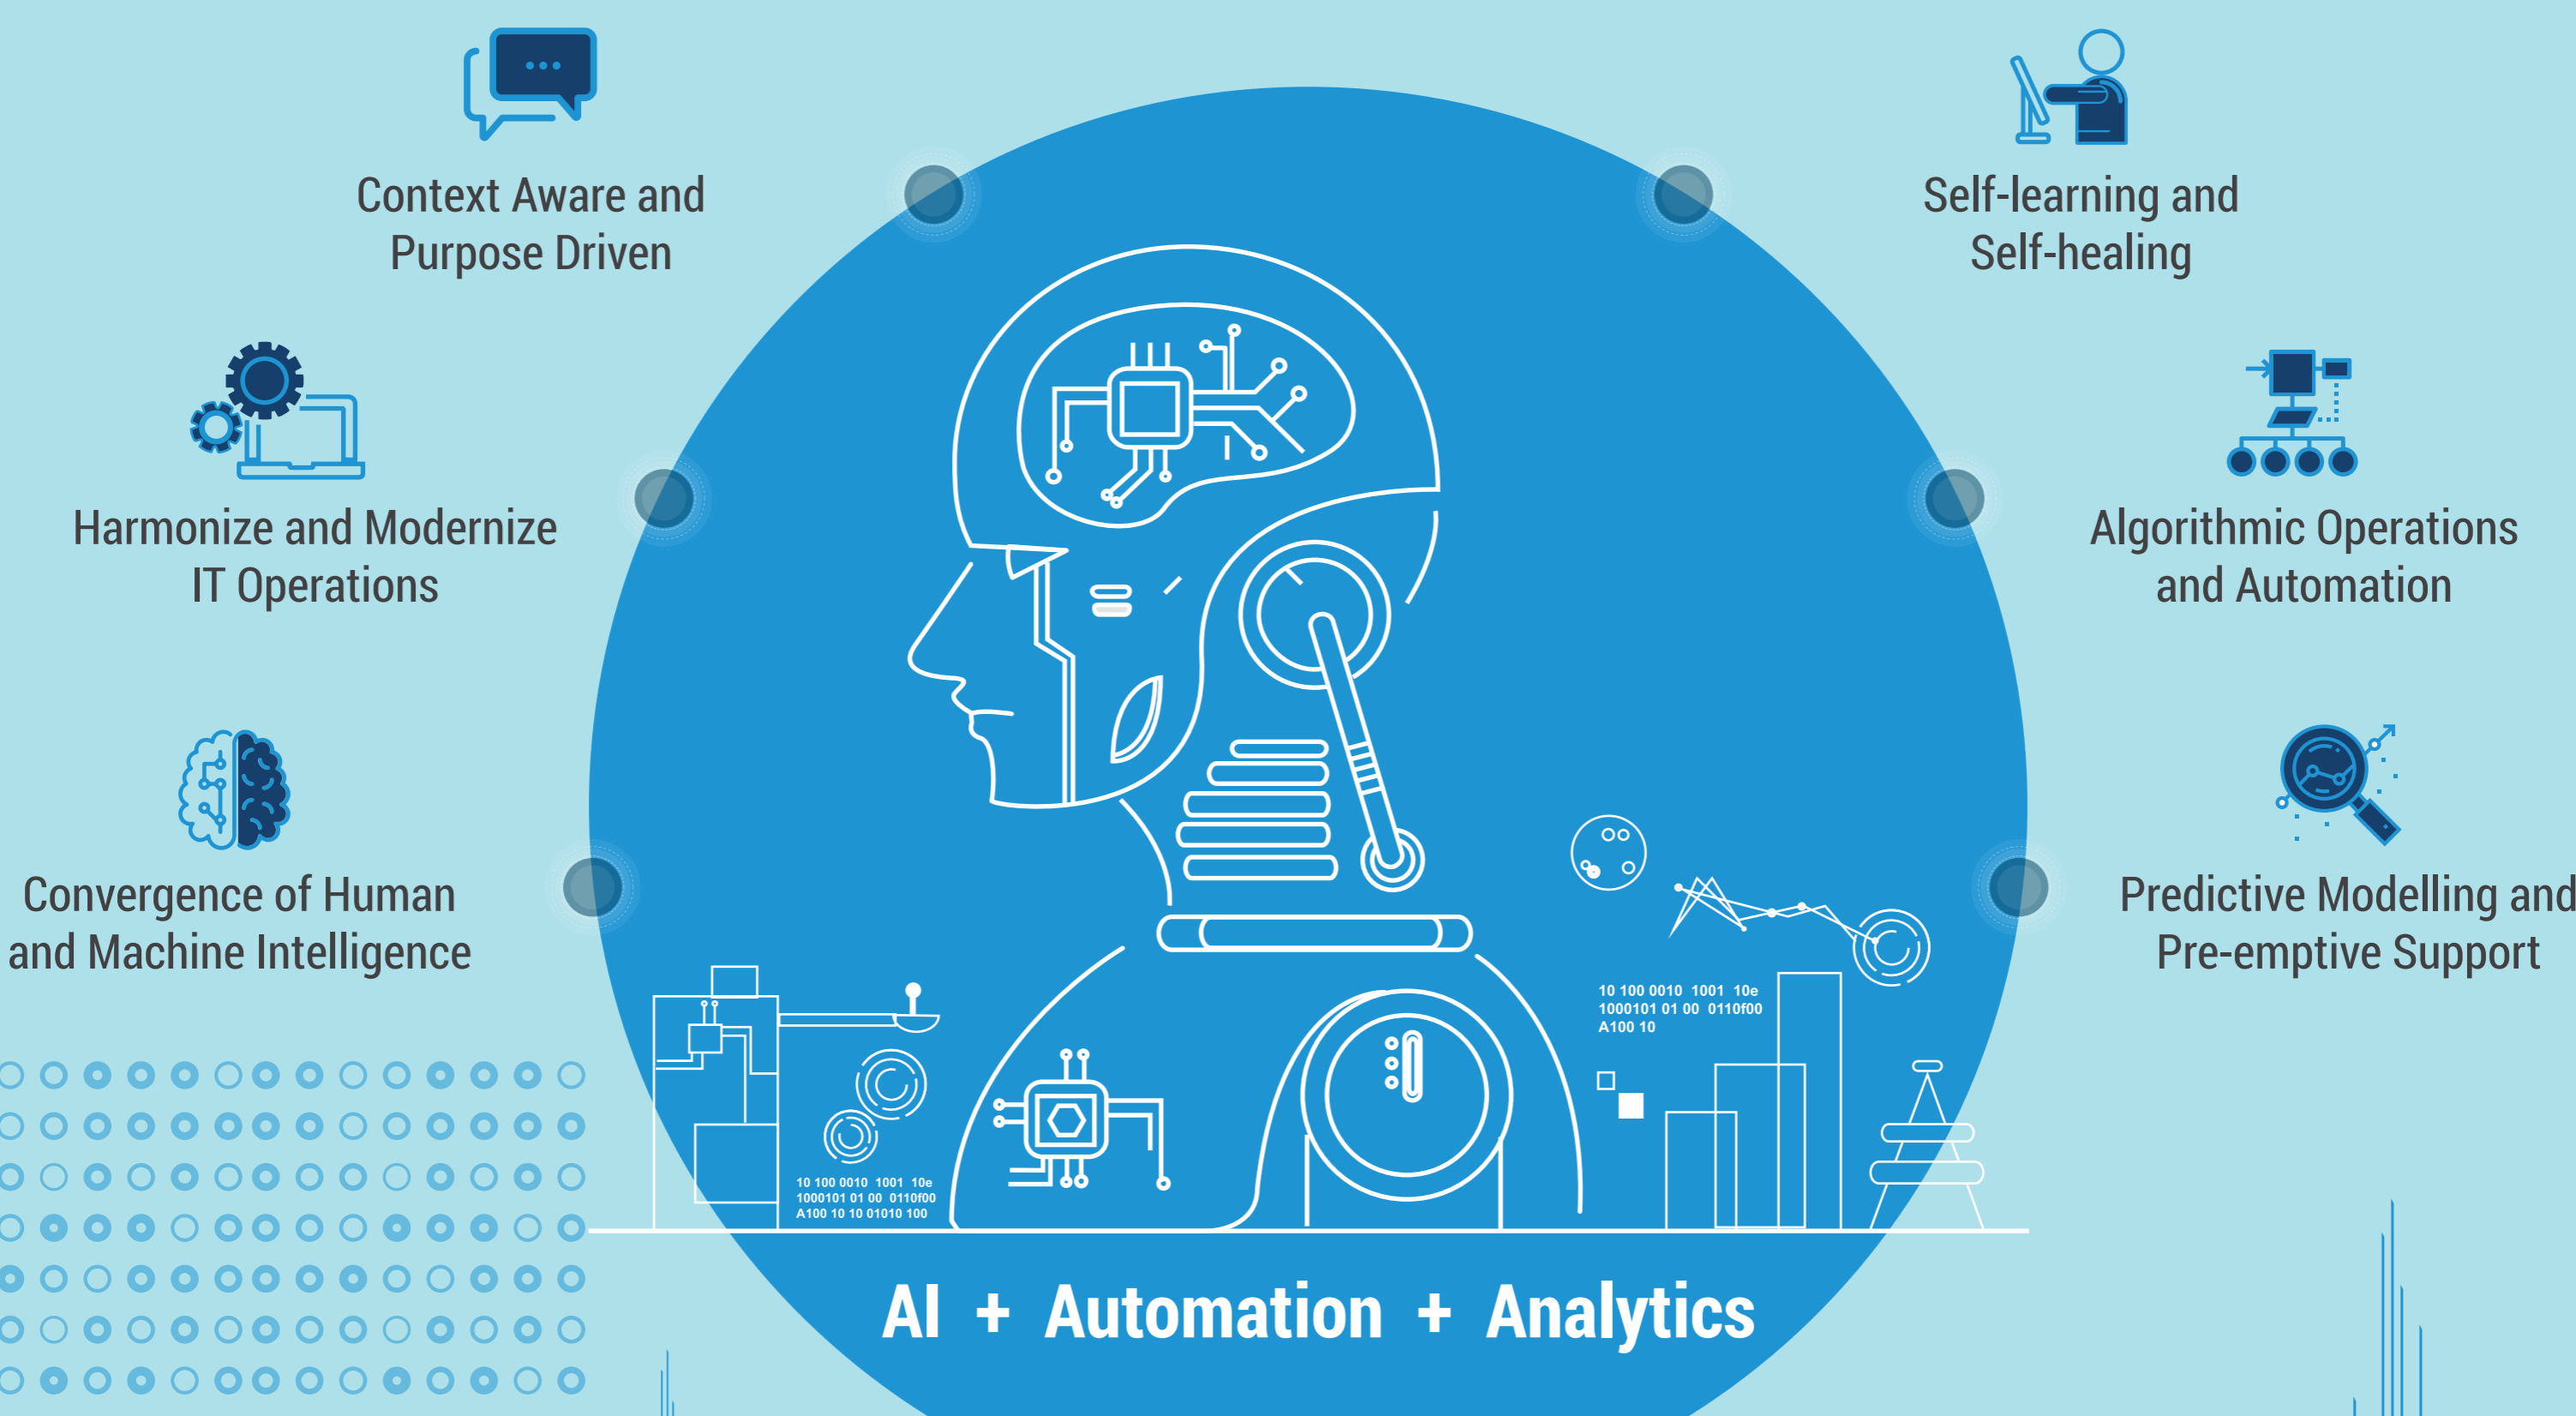

- To optimize and modernize IT operations
- Accelerate business processes and drive customer centricity
- Improve service availability and eliminate inefficiency
- Reduce Total Cost of Ownership (TCO)
- Faster time to market

65% IT budgets are spent on supporting IT applications and infrastructure activities **Gartner**

Future Proof Your IT Infrastructure Management with AI

- Adopt an intelligent, agile and modular solution, which pre-empts your infrastructure needs and works autonomously
- Automate operations to reduce human intervention and errors
- Leverage Intelligent Automation autonomously

Powering the Future of Enterprises with Intelligent Automation

AI + Automation + Analytics

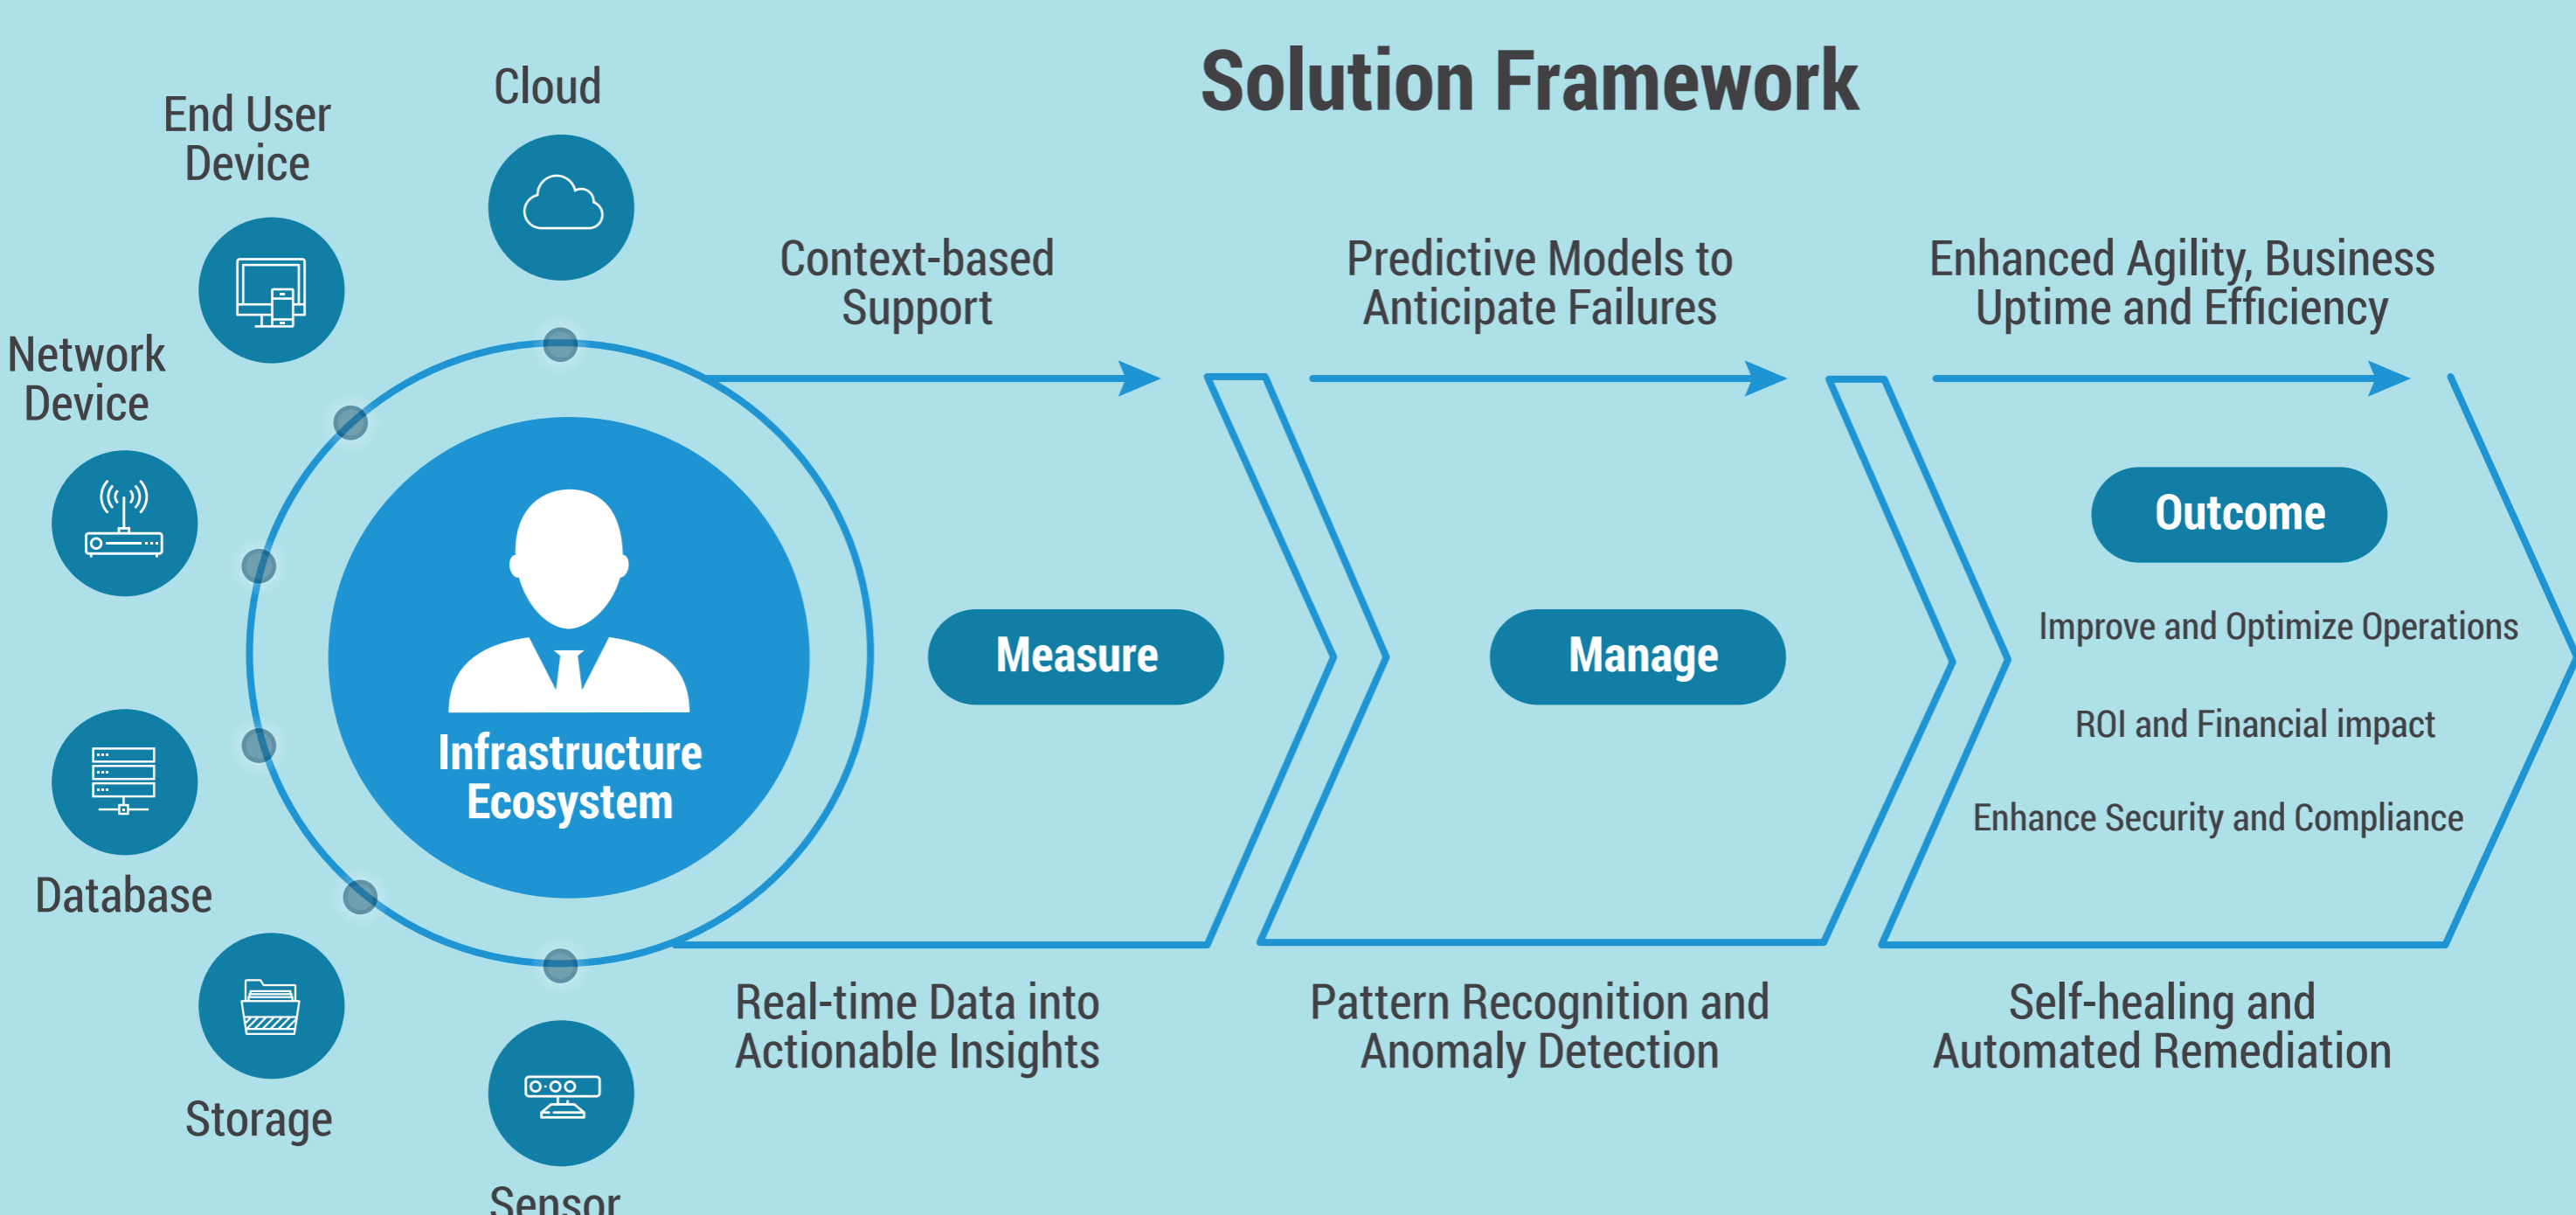

90%

Organizations will adopt a hybrid infrastructure
Gartner (ESTIMATED : 2020)

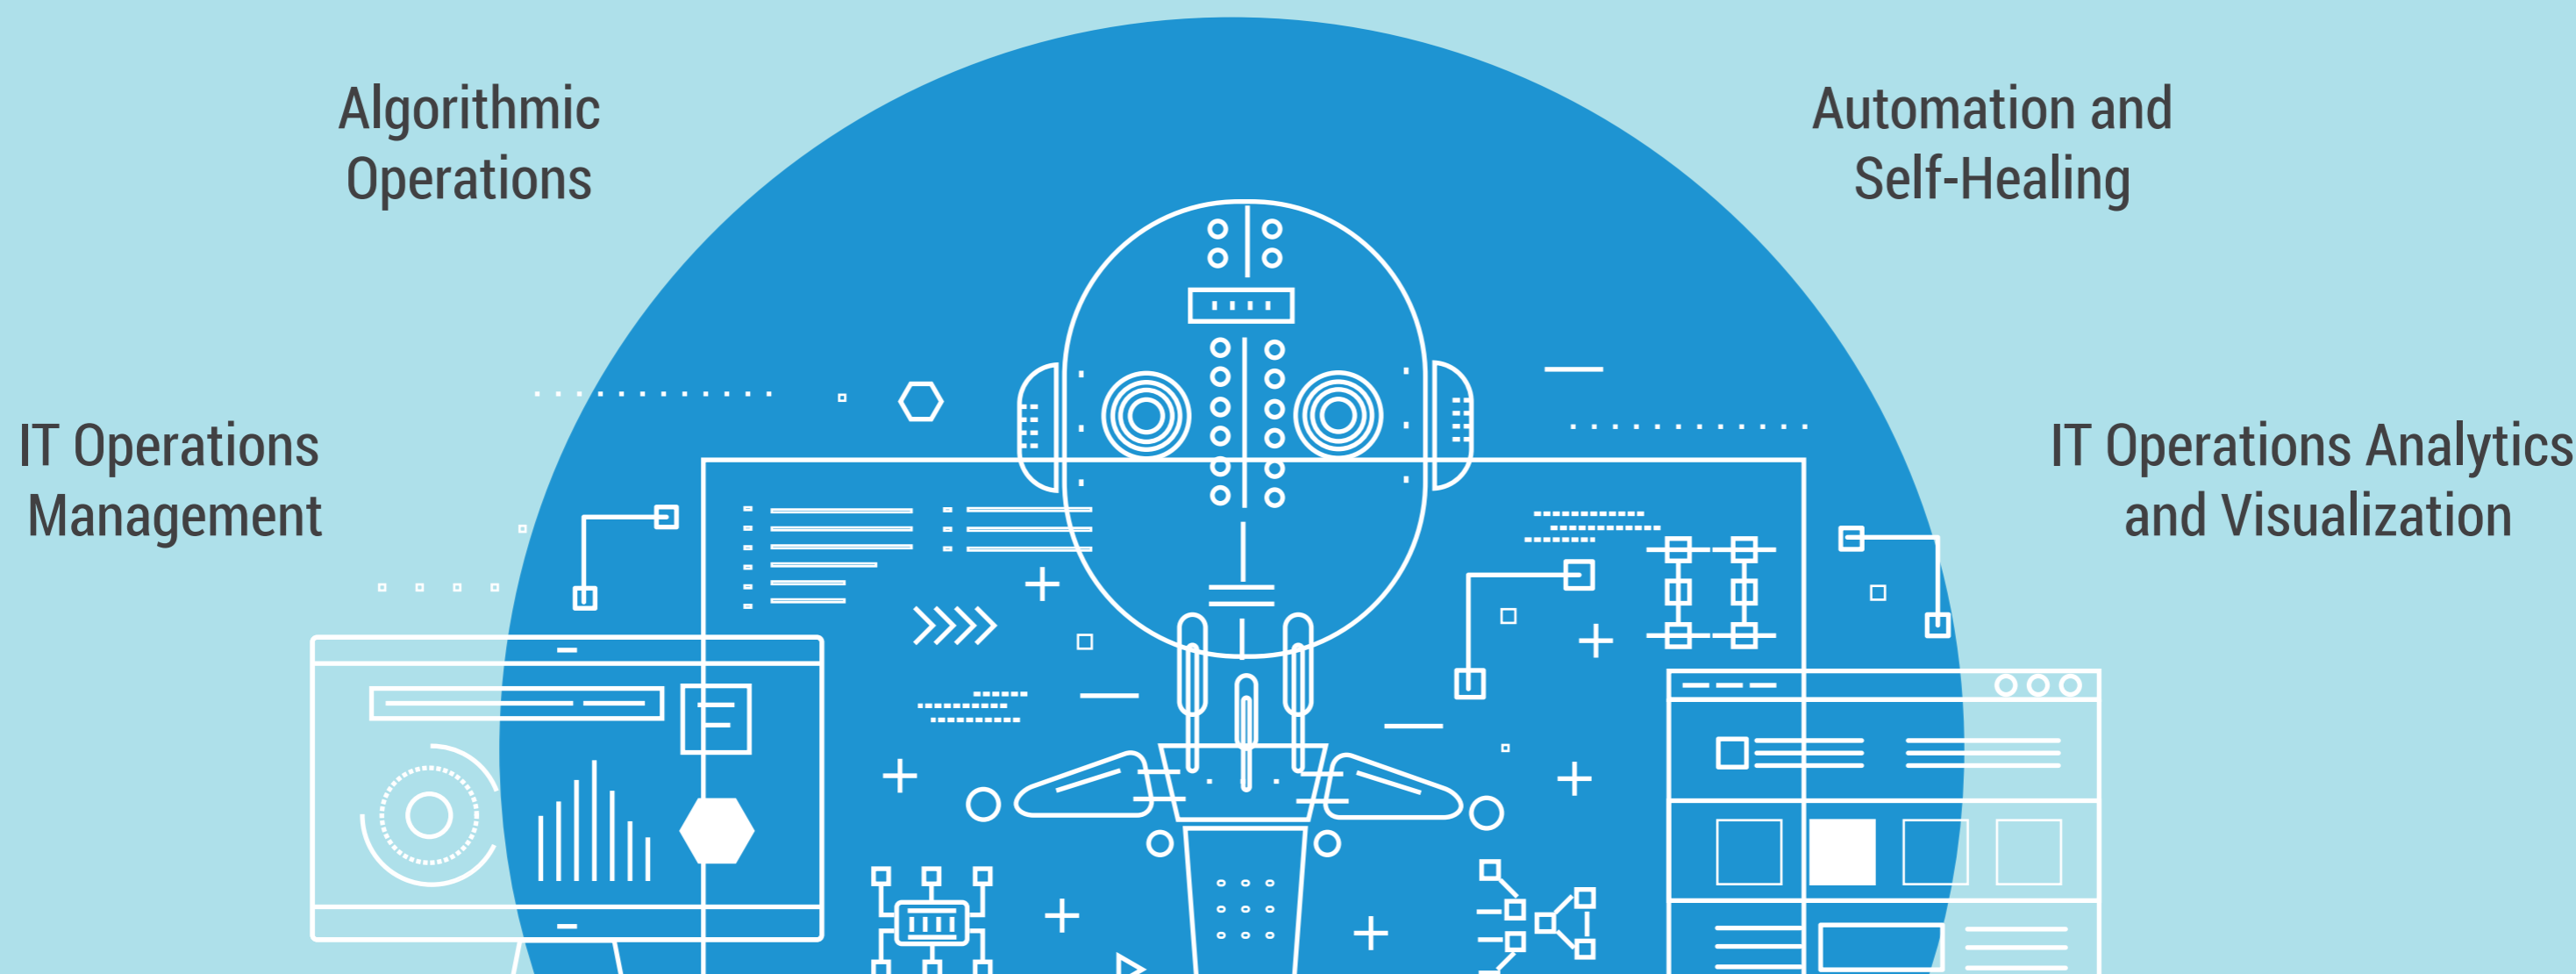

We must follow an intelligent automation platform that simplifies IT infrastructure complexity and help organizations to focus on their core business operations.

Our Solution

Contelli – an intelligent automation platform, is an amalgamation of AI, analytics and automation that cohesively predicts models and subsequently manages a complex infrastructure ecosystem effortlessly. It results in an unprecedented customer experience by simplifying your operational activities through cognitive technologies.

Key Features

Benefits

- 30-40% Increase in Operational Efficiency
- Increased Employee Productivity
- 30-45% Reduction in IT Helpdesk Volumes
- 5X Improvement in Mean Time To Repair
- 40-60% Reduction in TCO
- 45-65% Reduction in FTEs
- Quick Incident Resolution

WHY CONTELLI?

- Context Driven IT Operations Management
- Automated Insights
- Convergence of AI, Analytics and Automation
- Modular and Flexible Solution
- Focused on Simplifying IT Support Operations
- Outcome-based Pricing Model
