

Data Labeling & Annotation Services

Label, manage, and operate your training data at scale

Why CSS Corp?

- » Ability to manage complex datasets and mission-critical projects having a high degree of uncertainty
- » Diverse portfolio of customized services across domains and applications
- » Differentiated business models to drive co-innovation
- » Teams of best data labeling professionals globally, led by experienced AI/ML and data experts & consultants
- » Consultative partner that is future-ready

Top Use Cases

Automotive

E-commerce

Healthcare

Retail & CPG

Telecom

Banking

Our Value-adds

- » Sentiment Marking
- » Empathy Analysis
- » Information Digitization
- » Multilingual Translations
- » RPA Integration
- » Content Moderation

Curate high quality datasets & accelerate your production environment

- » Drive friction-less interactions between machines and humans
- » Create ground truths to develop data efficient models
- » Ramp up your annotation throughput with reduced costs
- » Automate tasks for your machine learning algorithms

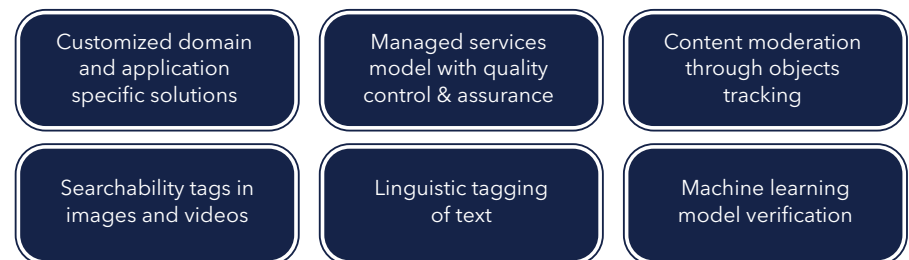

KEY SERVICES

KEY OFFERINGS

Voice/Audio Annotation Solutions	NLP Annotation Solutions
<ul style="list-style-type: none"> » Automatic Speech Recognition » Automated Speech to Text Validation » Grammatical & Discourse Proofing Tool 	<ul style="list-style-type: none"> » Sentiment Analysis » Virtual Assistant Training » Data Mining /Tagging & Extraction
Visual Labeling with Computer Vision	Unsupervised Entity Resolution
<ul style="list-style-type: none"> » Image & Video Annotation (AR/VR Support) » Bounding Boxes » Advanced Object Recognition 	<ul style="list-style-type: none"> » Identity Recognition » Ontology Resolution » Record Linkage

KEY FEATURES

BUSINESS OUTCOMES

- » **>90%** accuracy in text extraction
- » **>26%** improvement in productivity
- » **>60%** reduction in editing scope with automated QC
- » Real-time analytics and progress dashboard
